## **FOREWORD.....1**

The International Commission Against Impunity in Guatemala (CICIG), the foreign entity at the heart of Guatemala's political and legal system, is actually near its closely-held goal of establishing itself as the director of Guatemala's destiny. These reports are meant to open the curtain and let things be seen. | [Web Version](#) / [PDF Version](#)

## **Part 1 | Murder by Diplomatic Immunity.....2**

A police force directed by the CICIG and its handmaiden, Guatemala's Justice Ministry (MP), makes an illegal pre-dawn raid against a residence in the capital city and kills the wrong man. In response to a lawsuit, the CICIG invokes diplomatic immunity, absolving itself; while the MP says no crime occurred. | [Web Version](#) / [PDF Version](#)

## **Part 2 | The President Versus the Commissioner.....6**

Guatemala's President Morales, as part of his power to expel any diplomat, orders the CICIG commissioner, Iván Velásquez, to leave the country. In violation of national and international law, Guatemala's high court reverses the president's order and puts Velásquez above any justice. | [Web Version](#) / [PDF Version](#)

## **Part 3 | From Here to Eternity: The Pavón Prison Cases.....9**

In 2006, Guatemalan forces re-established order in the country's toughest prison. The country's human-rights ombudsman – who at first praised the operation, in which seven inmates died – later asked the CICIG to prosecute. The result is a travesty that violates the norms of justice and continues to this day. | [Web Version](#) / [PDF Version](#)

## **Part 4 | The Case of the Disappearing Attorney General.....14**

Working with Guatemala's president, its high court, and the US ambassador, the CICIG engineers a judicial coup that removes Attorney General Conrado Reyes from office. This 2010 coup marks the first of the CICIG's efforts to remake the country's political and legal system in its own image. | [Web Version](#) / [PDF Version](#)

## **Part 5 | Soviet Show-Trials in the Americas:**

### **The Case of the CICIG versus Moisés Galindo.....18**

With the help of Guatemala's justice ministry and judges, the CICIG goes after Moisés Galindo, an attorney who has opposed the commission in court. The CICIG breaks a lawful bond between the attorney and his client, imprisons Galindo, confiscates his property, and prosecutes against the rules. | [Web Version](#) / [PDF Version](#)

### **Part 6 | Seven Years in Prison for Nothing at All.....22**

In an effort to give cover to Guatemala's besieged president, the CICIG injects itself into a prominent murder case far beyond its mandate. As a result of testimony coerced by the CICIG, two brothers spend seven years in jail before a judge finally frees them, declaring that the CICIG has not made a case. | [Web Version](#) / [PDF Version](#)

### **Part 7 | The CICIG in Brief: or, Progressives Against the Fools' Brigade.....26**

A short history of the controversial commission shows that Guatemala's leaders didn't want the CICIG, perceiving it to be at odds with the country's sovereignty and laws. Even so, the country bowed to international pressure and welcomed the CICIG – a decision that Guatemalans today increasingly regret. | [Web Version](#) / [PDF Version](#)

### **Part 8 | The CICIG and Guatemala's Constitution.....31**

The CICIG sponsors an effort to rewrite Guatemala's Constitution, with the evident goal of bringing radical change to the country's laws. The CICIG is violating the law in doing so. The justice minister attacks Congress's right to free speech, while the US removes a congressman's visa for US travel. | [Web Version](#) / [PDF Version](#)

### **Part 9 | The Lawlessness of Guatemala's Justice.....34**

CICIG commissioner Velásquez and Justice Minister Aldana press their attacks against Congressman Fernando Linares, who has vigorously opposed their project for radical changes to the Constitution. The US embassy piles on Linares, thereby involving the US in an effort that undermines law and liberty. | [Web Version](#) / [PDF Version](#)

### **Part 10 | Imperialism in Latin America.....37**

The Obama administration announced the end of US imperialism. But imperialism has only changed form. It is now being delivered by institutions from inside Guatemala; notably by the country's high court and especially by the CICIG, which is promoting a radical takeover with help from the US. | [Web Version](#) / [PDF Version](#)

### **Part 11 | “Open, Sesame!” The Triumph of Politics Over Justice.....41**

The CICIG is consolidating its control over judicial appointments as a means to control what is law and what is not. A feature of this takeover is the language now being used to express legal concepts; its relationship to law is no greater than that of the magical phrase written for Ali Baba and his 40 thieves. | [Web Version](#) / [PDF Version](#)

### **CONCLUSION | The Runaway Commission.....47**

The CICIG came to Guatemala to oversee the dismantling of subversive groups that were robbing the people of their liberties. Instead, the CICIG has itself become the leading subversive entity. It's time for the CICIG to submit to oversight, and for Guatemalans to reclaim their sovereignty and laws. | [Web Version](#) / [PDF Version](#)

### **AFTERWORD | The Ministry of Virtue.....49**

A renowned academician and commentator, Armando de la Torre has been opposing the CICIG ever since it was publicly proposed. Unlike some others, Dr. de la Torre does not see the CICIG as a good idea gone bad. He sees it as a bad idea that has fulfilled its destiny. | [Web Version](#) / [PDF Version](#)

## FOREWORD

---

The International Commission Against Impunity in Guatemala (CICIG) is the predominant and most powerful institution in Guatemala. It has generated plenty of coverage – but only in the superficial mode of present-day journalism.

Reporters have taken the commission largely at its word, while scrutiny has gone missing. The purpose behind the following series of narratives is to open the way to scrutiny.

Ever since the beginning of its charmed career, the CICIG – acronym pronounced «see-SEEG» – has been awash in buzzwords. In describing itself and its mission, the CICIG has invariably used terms like anti-impunity, anti-corruption, pro-human rights, pro-indigenous rights, pro-women's rights, and others of the kind. These also happen to be the buzzwords of an international political movement which identifies itself as “progressive” and which regards the CICIG as a crucial component.<sup>1</sup>

In the narratives that follow, we will not judge the labels that the CICIG has affixed to itself; nor will we propose other labels. We will simply recount a series of legal or law-enforcement situations in which the CICIG has chosen to involve itself. To provide contrast, we will describe at least one situation in which the CICIG chose not to involve itself.

These narratives are aimed at policymakers, at journalists, at students, and at the interested general reader. With subjects chosen by legal experts, they are based on court documents, on direct or primary sources, and on news reports.

Our aim is not one of ‘exposing’ the CICIG in a journalistic sense. It is, rather, to draw the curtain aside and let the reader form his or her own impressions. These pieces are not scholarly works, nor are they lawyer's treatises. Across the various episodes, a coherent picture does take shape, which readers may discover at their own pace.

We do not hope or pretend that our portrayals will be to everybody's liking. The field that these narratives treat is a highly charged and politicized one, with issues that touch on life and death. Our writing on these matters is also an invitation to a dialogue about them.

Our aim, rather than controversy, is to raise curiosity. We don't demand to be taken at our word, as others in this field sometimes do. If we inspire readers to explore the issues on their own, our highest goal will have been attained.

We will release the first of our pieces tomorrow, and we will continue to release them at intervals during the next few weeks.
